

THE SOCIAL IMPACT OF TECHNOLOGY

How technology **positively influences** our daily life

19.00 to 21.00

How does technology in general and especially social media positively influence our daily life? Is it possible to change the world into a better place with the advantages of modern technology? Is improving our society just a dream, or is it already happening? We have invited several guest-speakers from different projects and companies to discuss these questions with us and show us, how they try to improve our daily life with the advantages of modern technology. After the speeches we discuss together, what has been done already and what should be done in the future, to bring people together and make the world a better place. Every single person is a part of the solution and every decision we make can have a huge impact.

ABOUT US

connectZ is an app, that brings people together. With our local based social network, users can discover people and the world around them. We want to encourage real life connections and improve daily life. By focusing on topics like reducing food waste and strengthen carpooling with electric cars, we want to help our users to make sustainable choices every day.
